Dear Sir or Madam,

Please accept my submission for the Advanced Technology International (ATI) internship program. I am excited for the opportunity to apply the skills I have learned through my studies in real-world scenarios, and I believe I would be a great fit for this program. As my resume and transcripts show, I have completed coursework in application development in multiple languages, including C++, Java, and scripting languages such as Shell and Perl, as well as several other relevant hardware and software courses.

Additionally, I have experience with database management and technical refresh of company equipment thanks to my previous internship position in the Information Technology Department of the Dorchester County Government, where I got experience in how to best perform as a member of a team, as well as how to most effectively manage my time so that I get things done as efficiently as possible. I am also a part of my campus' Computer Science honor society, Upsilon Pi Epsilon, with a 3.61 GPA. I anticipate graduating with my Bachelor of Science in Computer Science in the Fall of 2021. I am very hard working, determined, and often take a leadership role when working with others, guiding our teams to success through thorough communication and regular updates between team members.

Should you need any additional information, please let me know. Thank you for your time and consideration.

Sincerely,

Blake Collins
